

MAITREYA SATYA SAINATH ILLUPILLA

Business Intelligence Analyst

maiillupilla@gmail.com | +I (940) 268-4848

Business Intelligence Analyst with 4+ years of experience delivering data-driven insights across finance, operations, and product analytics domains. Proven expertise in building KPI-driven dashboards, scalable data models, and automated data pipelines to support business decision-making and performance optimization. Experienced in collaborating with cross-functional stakeholders to translate business requirements into actionable insights, improve reporting efficiency, and enable forecasting and strategic planning.

TECHNICAL SKILLS

- **Data Visualization:** Power BI, Tableau, Qlik Sense, Looker
- **Analytics & Programming:** Python (Pandas, NumPy, Scikit-learn), SQL (T-SQL, PL/SQL), R
- **Data Engineering & ETL:** Azure Data Factory, SSIS, Databricks, Airflow, Talend
- **Cloud & Data Platforms:** AWS (S3, Glue, Athena), Azure (Synapse, Blob, SQL DW), Snowflake, BigQuery
- **Big Data & Streaming:** Apache Spark, Kafka, Hadoop
- **BI & Governance:** dbt, DataHub, Collibra, Data Quality, Data Lineage
- **DevOps & Tools:** Git, GitHub Actions, Azure DevOps, CI/CD
- **Databases:** PostgreSQL, SQL Server, Oracle

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst | **Prudential Financial, Texas – USA** Jan 2024 – Present

- Designed and deployed Power BI dashboards tracking financial and operational KPIs (cost, revenue, risk metrics), improving decision-making speed for business stakeholders by enabling real-time visibility into performance
- Built scalable semantic data models with incremental refresh and row-level security, reducing dashboard load time and improving report performance by 40%
- Partnered with finance, operations, and risk teams to translate business requirements into executive-level dashboards, increasing stakeholder adoption and usage of BI reports
- Orchestrated end-to-end ETL pipelines using Azure Data Factory and Databricks, consolidating data from SQL Server, Snowflake, and cloud sources to create a unified reporting layer
- Implemented data validation, reconciliation, and quality checks, improving data accuracy and trust across reporting systems and reducing reporting discrepancies
- Developed predictive models using Python (scikit-learn) to support forecasting and trend analysis, enabling proactive cost optimization and planning decisions
- Automated recurring reporting workflows, eliminating manual processes and saving 60+ hours per month in operational effort

Business Intelligence Developer | **Hexaware Technologies, India** Jan 2021 – Dec 2022

- Developed interactive dashboards and scorecards using Tableau and Qlik Sense aligned with business KPIs, improving visibility into operational and product performance for stakeholders
- Built and optimized ETL pipelines using SSIS and SQL, improving data processing efficiency by 30% and enabling faster data availability for reporting
- Designed reusable data marts and semantic layers, enabling self-service BI and reducing dependency on manual reporting across business teams
- Automated data extraction, transformation, and reporting workflows using Python and SQL, significantly reducing manual effort and improving reporting turnaround time
- Collaborated with cross-functional teams to deliver actionable insights and performance metrics, supporting data-driven business decisions
- Implemented data quality and validation frameworks to ensure accuracy, consistency, and governance compliance, improving trust in reporting outputs
- Participated in Agile sprint cycles, contributing to continuous BI enhancements and timely delivery of analytics solutions

Business Intelligence Analyst Intern | **Hexaware Technologies, India** Feb 2020 – Dec 2020

- Assisted in developing dashboards and reports using Tableau and Excel, supporting operational reporting and business performance tracking
- Performed data cleaning, validation, and reconciliation, ensuring accuracy and consistency of data used for reporting
- Wrote SQL queries to extract and transform data from SQL Server and Oracle databases, improving data accessibility for analysis
- Supported senior analysts in KPI tracking and reporting, contributing to business performance monitoring and insights generation
- Documented data workflows, reporting logic, and business definitions to improve knowledge sharing and reporting standardization
- Gained hands-on experience in the end-to-end BI lifecycle, including data extraction, transformation, and visualization

Education & Publications

Master of Science in Advanced Data Analytics | University of North Texas, Denton, TX

Publication: “A Review on Black Hole Attack Identifier on VANET Communication in Vehicles”, Open Access International Journal of Science and Engineering
